# Integrating Digital Intervention to Reduce Sexual Harassment and Foster Justice

---

12/09/2024

Jessy Wang

# Current Problem

Study in 2014:

82% of women and 42% of men in the United States have experienced sexual harassment or assault in their lives.

Study in 2018:

81% of women and 43% of men had experienced sexual harassment or assault.

**The current policy and measures about sexual harassment do not function efficiently.**

# Current Problem

## **Sexual harassment:**

gender harassment,  
unwanted sexual attention  
sexual coercion

## **Could happen in:**

precarious working conditions.  
hierarchical organizations.  
a normalization of gender-based  
violence,  
toxic academic masculinities,  
a culture of silence,  
a lack of active leadership

**The complexity of sexual  
harassment makes it more  
challenging to identify.**

Sexual Harrassment

(National Academies of Sciences, Engineering, and Medicine [NASEM], 2018).

# Current Problem

More than half of students and faculty who experience sexual harassment do not report the incident

## **Barriers:**

Fear of retaliation from the harasser;  
Concerns about confidentiality;  
Normalization of harassment in academic culture;  
Victim-blaming attitudes;  
Lack of faith in institutional responses

**Huge Gap Between Harassment Rate and Reporting Rate**

Sexual Harrassment

(Bondestam & Lundqvist, 2020)

## Unpredictable Effect

**Mental health challenges,**  
**Substance use,**  
**Decreased academic performance,**  
**Impaired career trajectory,**  
**Isolation,**  
**and helplessness for individuals,**  
**...**

## Solution

**1.Reduce Assaulters :  
Education, Law, ...**

**2. Enough support to the  
(potential) victims**

(Bondestam & Lundqvist, 2020)

# Research Motivation:

I grew up in a small city in China, where there were barely any resources for sex education, let alone education on sexual harassment. It wasn't until I went to school in U.S. that I started learning about these topics, but by then I had already gone through a lot of confusion and challenges from not having that knowledge earlier.

What stood out to me was that the less people know about sexual education, the less likely they are to open up about issues like harassment, which can lead to much more serious consequences.

**For places lacking resources, how to build a scalable solution for reducing sexual harassment?**

# Research Question:

How could Conversational AI being integrated to alleviate obstacle between current sexual harassment issues and solutions?

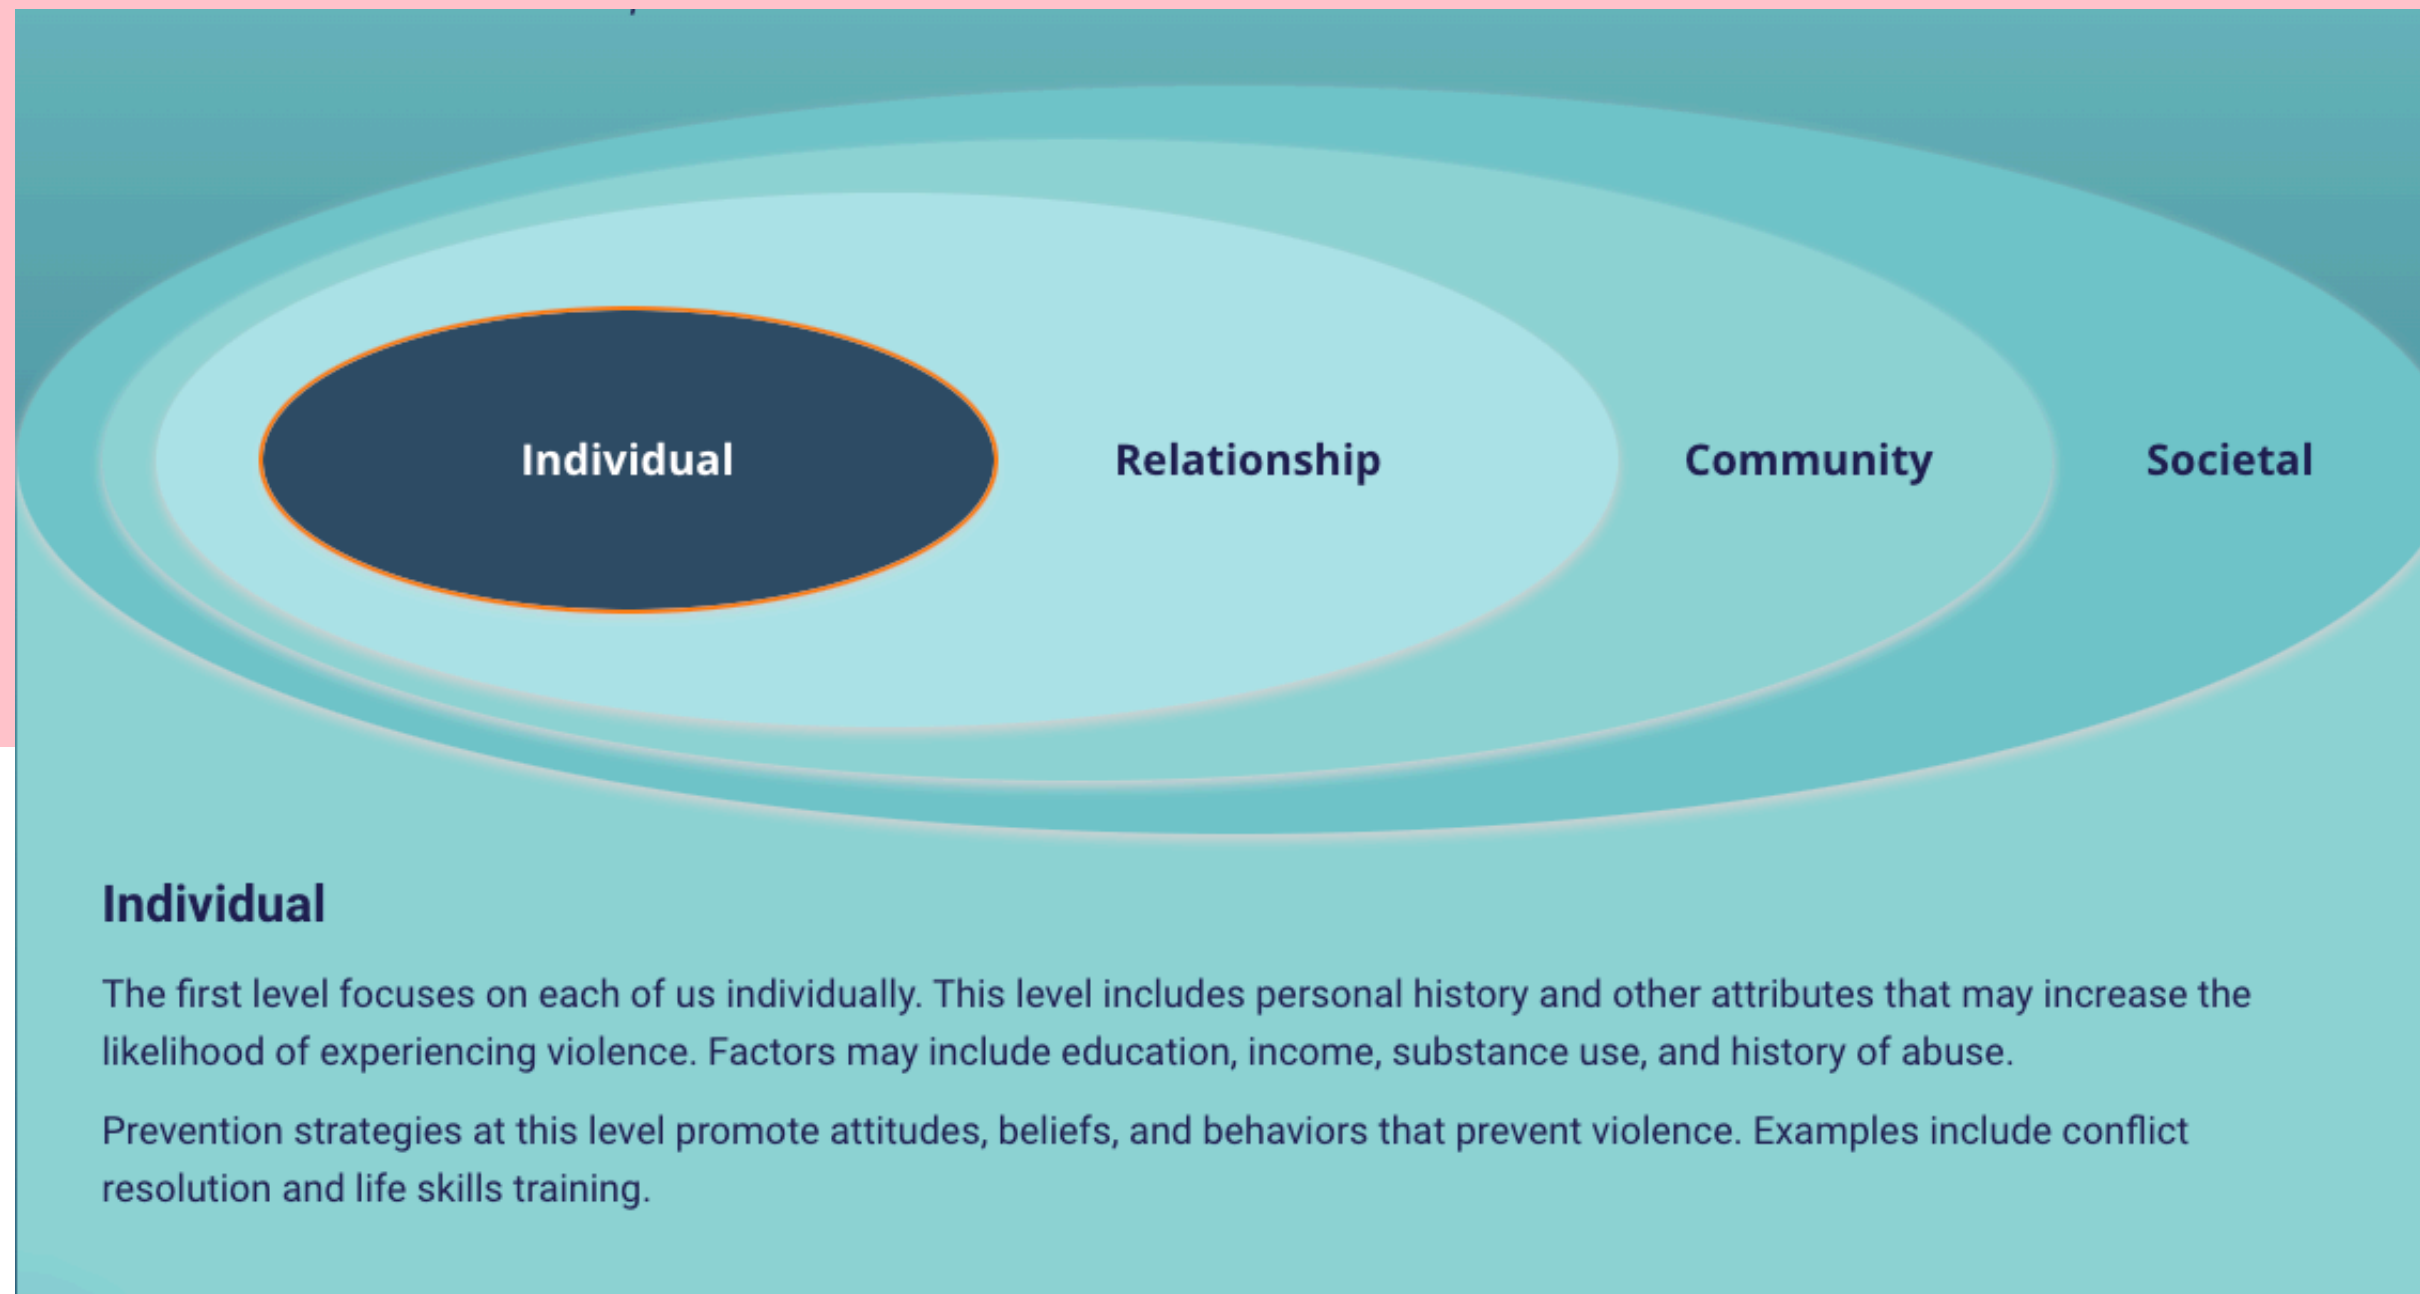

1. What are the barriers that Conversational AI could solve?

2. How could conversational AI being built to solve the barriers?

- Facilitator
- Ethical Issues

Sexual Harassment

# SAMPLING & RECRUITMENT

## Potential Informants

Sex Educator, Policy Maker, Social Worker, Survivor...

## Purposive/Convenience Sampling

1. Talking to my former co-workers in a Sex Education organization for Chinese

2. Reaching out to people working at Title IX

# CODEBOOK

## Individual Level

1. Personal Barriers	Users' hesitation to discuss sexual harassment topics due to the fear of social judgment or stigma.
1.1 Social Stigma	Societal shame associated with discussing sexual harassment, leading to reluctance in engaging with the topic.
1.2 Embarrassment	Personal discomfort or awkwardness when discussing sexual harassment-related topics in public or private settings.
1.3 Fear of Judgment	Concern that discussing sexual harassment might lead to being judged by others, reducing willingness to engage.

# CODEBOOK

## Individual Level

<b>2. Confidentiality and Sense of comfort</b>	Importance of maintaining privacy for individuals engaging in sexual harassment education.
<b>1.1 Privacy Concerns</b>	Worries about personal information being exposed.
<b>1.2 Confidentiality Needs</b>	Need for a secure environment that ensures anonymity and protects users' identities.
<b>3. Flexibility in Learning</b>	Users can selectively explore topics at their own needs.

# CODEBOOK

## Interpersonal Level

<b>4. Influence of Friends and Family</b>	Social stigma within interpersonal social circles that discourages individuals from discussing sexual harassment related topics.
<b>5. Non-Judgmental Support</b>	Chatbots provide a non-judgmental safe space for users who may feel uncomfortable discussing harassment topics with others.

# CODEBOOK

## Organizational Level

<b>6. Integration into Institutional Settings</b>	Embedding chatbots within educational or corporate systems to enhance accessibility to sexual harassment education.
6.1. School Curriculum Integration	Incorporation of chatbot-assisted learning into school programs
6.2. Workplace Program Integration	Embedding chatbot tools within workplace training

# CODEBOOK

## Community Level

<b>7. Social and Cultural Norms</b>	Cultural norms that affect open discussion about sexual harassment.
7.1 cultural taboo	Content of sex harassment education is hard to discuss in some culture
7.2 Adaptation to Cultural Contexts	Chatbots' potential to provide education in a culturally sensitive manner

# CODEBOOK

## Policy Level

<b>8. Legal and Ethical Boundaries</b>	Requirement for chatbots to adhere to privacy laws and confidentiality standards.
8.1 Compliance with Privacy Laws	Adherence to privacy regulations to protect user data and maintain confidentiality.
8.2 Ethical Standards for AI	Ensuring that AI-driven chatbots operate within ethical guidelines, particularly in dealing with sensitive topics.
<b>9. Systematical adaption</b>	Efforts to encourage policies that support the use of AI-driven tools for accessible sexual harassment education.

# MAJOR THEME #1

Confidentiality, combined with a secure and non-judgmental environment, allows users to explore difficult sexual harassment topics without fear of exposure or judgment.

“—  
|

“... It’s easier for them to engage with the chatbot than to ask these questions to people they know, **who might not understand or might judge them**”

- Informant #1

—”  
|

## MAJOR THEME #2

Limited interpersonal support allow potential role of chatbots in providing safe conversation spaces.

“—  
|

“... People don’t always feel they can talk to their family or close friends about these things, which **makes it even harder to access reliable information and support.**”

- Informant #1

—”  
|

## MAJOR THEME #3

Flexibility is an essential design feature for chatbots in sexual harassment education, allowing users to engage with content at their own pace.

“—  
|

“...A chatbot can bypass this by **going straight to what the learner cares most about**”

- Informant #2

—”  
|

## MAJOR THEME #4

Adapting language and examples to users' cultural backgrounds helps reduce stigma and makes the chatbot more relatable.

“—  
|

“...The language and examples provided should **align with the cultural background** of the user...”

- Informant #1

—”  
|

## MAJOR THEME #5

Embedding chatbot-driven resource within institutional settings—like schools and workplaces—can greatly enhance its accessibility.

“—  
|

“...Workplaces need to implement this type of training to make it accessible for all employees.”

- Informant #2

—”  
|
